Camrose, AB

Canada

To whom it may concern,

My name is Nash Boisvert, and I am currently a DMIT student with a burning passion. I have been anxiously waiting to write this letter since the beginning of the program, and in a retrospective way, since childhood.

I have been absolutely enamored with technology since youth. I have picked every device apart to raw PCB and put it back together. I remember learning file structures from installing game mods as a small child. I have jailbroken every phone I've ever owned. I also remember bricking my phone because I was too young to know what I was doing, but no one was going to stop me from trying.

I have even used opensource technologies to navigate the daily challenges of my diabetes. The moment I saw my blood sugar graph in a perfectly straight line, as opposed to dips and valleys, as the direct result of a Github project (OpenAPS) was the exact moment I wanted to dedicate my life to code. I realized that I could not only create interesting and fun programs and games but I could possibly change people's lives for the better.

After around a year of self-teaching Python3 in my spare time away from my fulltime job, I ended up enrolled NAIT. I maintained a very high GPA, was on the Deans Honor Roll, and helped other students along the way. During my first week there, I created a Discord server for my peers that I have owned and moderated since, because I just couldn't get enough time in code.

I ended up working at CGI Group for the Alberta Government Justice and Solicitor team. I developed many Proof-of-Concept applications as a solo full stack developer. I felt the imposter syndrome, I felt overwhelmed at times, but I overcame, and produced everything requested, with very positive performance reviews along the way.

I proved to myself that I belong here.

I will personally guarantee that I am the most aggressive self learner that will ever apply to your company. My hunger for tech knowledge is insatiable. I have lived and breathed technology to its deepest levels since childhood, and I don't ever intend to stop. It has made me into who I am today, and it continues to mold my future.

Thank you for your consideration,

Nash Boisvert

## WORK EXPERIENCE

---

### CGI Group

Jan. 2022 – Current

*Full Stack Software Developer*

*Edmonton, AB*

- CGI Group is the largest software company in Canada. I was placed as a student for 8 months.
- Worked as part of the Alberta Governments Justice & Solicitor General team.
- Documented very positive job performance reviews as per student requirement, available on request.
- I built several proof-of-concept apps and web apps as a solo developer with and without UI design support.
  - One full scale app in .NET Maui (current project)
  - Web application in .NET/Entity Framework.
  - Many React/Redux based front ends.
  - Database and server management tasks.
- Due to confidentiality agreements, details of these projects are limited.

### Cargill

Nov. 2019 – May 2021

*Laboratory Technician/Elevator Operator*

*Camrose, AB*

- Cargill is the largest privately owned company in the world. They are primarily involved in agriculture.
- As a laboratory technician I over saw plant equipment operation through DeltaV software and graded canola.
  - Redesigned major data collection from Excel sheets to SQL database.
  - Major involvement in efficiency project leading us from 120 samples per day average to 145 average.
- Writing general procedure manuals for office ease of training.

**Western World Exteriors****May 2016 – Oct 2019***Foreman/Laborer**Edmonton, AB*

- Western World is a construction company focused on major commercial developments.
- Worked as general laborer for a year and a half before leading my first crew.
- Worked on the full renovation of Scotia Place exterior via swing stage.
  - Started as laborer, was promoted.
  - Led crew of 10 with strict progress deadlines.
  - Finished job with no incidents.
- Worked on Rogers Place exterior.
  - General construction labor.
  - Intense safety oversight, no incidents.
  - Worked as general laborer until being promoted to equipment operator.
